Literature (2010)

Web Development Experience

Lead Customer Success Engineer & Web Developer

January 2017 - Present / Shareaholic, Inc., Boston MA

Act as primary liaison between users and engineers, identifying and resolving bugs and issues. Act as sole designer and developer on multiple production-ready user-facing features, most notably:

Shareaholic Learning Center (shareaholic.com/learn)

Conceive and create database and UI for repository of educational resources on website marketing, utilizing MySQL, ActiveRecord and responsive web design best practices to allow for dynamic rendering of content.

Share Count Recovery Tool (sharescore.com)

Develop single-page app built on an existing Rails back-end, leveraging JS Promises to make multiple AJAX calls across several third-party APIs and parse received data to determine and display difference in reported share counts from user-provided URL input.

Suggested Twitter Accounts Feature

Interface with React and Rails to append user-provided values to Twitter share APIs.

Web Development Immersive Course

August - November 2016 / General Assembly, Boston MA

Completed course over 12 weeks and strengthened full-stack development skills through practical programming projects while applying industry best practices in a collaborative environment. Notable Projects include:

Jeopardy Client & Rails API

Constructed Jeopardy Game using complex modelling through a custom built Rails API, as well as corresponding front-end SPA client, powered by jQuery, for user playability.

Keepr Ember Client & Rails API

Built over the course of a six-day sprint, Keepr is a fully-functional Ember client featuring dynamic data rendering and a strong focus on UX, supported by a Rails backend.

Additional Career History

2013 – 2016 / Sales Operations Manager

Pearson Education, Boston MA

Worked with Sales and Customers to assist in creating custom educational solutions for over fifty higher educational institutions in the Mid-Atlantic Region.
